

I am writing in response to the chance that the NJ Do Not Call list will be overturned.
The Do Not Call list in NJ is the best thing that has ever happened!! Please do not take it away. I used to get 2-3 calls every night from unwanted solicitation. Now I might get one call a week, which makes me absolutely crazy, and I've reported those people. My phone rings all day at work and the last thing I need is to go home and have it continue to ring with calls that I absolutely do not want to answer. I can tell you this, if the do not call list is tampered with in any way, you can be assured that I will file a complaint EVERY TIME I get a call that I do not want. And that just means that someone is going to have to take the time to read those complaints and that to me seems like something that NJ is not going to want to spend it's money on. NJ should be spending it's money on important things, not checking into phone call complaints.
